 THE ORIGINAL	ITAPS4	ITI Automotive Skate	\$28.99	2	ITI Automotive Skates are ideal to use when moving, loading and unloading a locked, disabled or wrecked car or truck. These ITI Skates will drastically reduce the moving resistance, eliminate tire damage and make your operator more efficient and safer. Simply wedge a skate under the tires of the vehicle and begin winching. In times when you are having difficulty wedging the skates beneath the tires or wheels, the large face and durable design of the ITI skate withstands being driven into place with a mallet. These lightweight skates perform well on most surfaces including gravel, asphalt and cement. Also, utilizing skates when loading vehicles will protect the deck of your bed or trailer from damage. A better customer service will be provided because the skates will minimize the scrapes and mars on the driveway or parking lot too! ITI automotive skates are made from a unique recycled material which provides the most durable and longest lasting performance versus competitive products. ITI skates are manufactured in the USA. For the pair of skates use part #ITAPS4-PR. For a set of 4 skates use part #ITAPS4-KIT. * Please note the attached wire lanyard is for handling and storage only - NOT a pull point.	<ul style="list-style-type: none"> Made from extruded recycled plastic Rot, wear, oil and grease resistant Stronger than wood Dimensions: 16"L x 3.5"W x 3.5"H Cable handle Sold individually
	ITAPS4-PR	ITI Automotive Skate Pair	\$51.99	4	This ITI Automotive Skate pair of 2 are ideal to use when moving, loading and unloading a locked, disabled or wrecked car or truck. These ITI Skates will drastically reduce the moving resistance, eliminate tire damage and make your operator more efficient and safer. Simply wedge a skate under the tires of the vehicle and begin winching. In times when you are having difficulty wedging the skates beneath the tires or wheels, the large face and durable design of the ITI skate withstands being driven into place with a mallet. 	ITCAS4	ITI Low Pro Control Arm Skate	\$104.99	5	ITI Low Profile Control Arm Skate is designed for use on a disabled or wrecked vehicle with a missing wheel or lugnuts, a broken ball joint, control arm, axle or other suspension components. This skate is perfect for use with high-end vehicles with low clearance concerns. The top of this patented skate has a pocket for the ball-joint and cradles the a-frame of the suspension. The rounded ends of this skate allow for easy loading as it will navigate the approach lip of a bed or trailer. ITI Control Arm Skates are made from a unique recycled material which provides the most durable and longest lasting performance versus competitive products. ITI skates are manufactured in the USA. * Please note the attached wire lanyard is for handling and storage only - NOT a pull point.	<ul style="list-style-type: none"> Made from extruded recycled plastic Rot, wear, oil and grease resistant Stronger than wood Dimensions: 18"L x 3.5"W x 3.5"H Cable handle Sold individually
	ITCAS4E	ITI Height Extender for the Low Pro Control Arm Skate	\$78.99	3	This ITI Height Extender is designed to work specifically with the ITI Low Profile Control Arm Skate (item # ITCAS4). The Height Extender provides additional ground clearance when maneuvering certain vehicles. Nested together, the two combine for an overall height of 5-1/2". The ITI Height Extender is made from a unique recycled material which provides the most durable and longest lasting performance versus competitive products. ITI skates are manufactured in the USA. * Please note the attached wire lanyard is for handling and storage only - NOT a pull point.	<ul style="list-style-type: none"> Made from extruded recycled plastic Stronger than wood Rot, wear, oil and grease resistant Stronger than wood Dimensions: 18"L x 3-1/2"W x 5-1/2"H Sold individually
	ITCRL	ITI Starter Ramp	\$45.99	4	ITI Starter Ramp bridges the gap between the tail of a flatbed car carrier or trailer ramp and the ground surface, creating an easy transition between uneven surfaces. This starter ramp is designed with a 90 degree notch for the tail to sit in place. The low load angle the ramp provides prevents unnecessary damage to high-end vehicles or equipment with low clearance issues. The ITI ramp is made from a unique recycled material which provides the most durable and longest lasting performance versus competitive products. ITI skates are manufactured in the USA. For the pair use part #ITCRL-PR.	<ul style="list-style-type: none"> Made from extruded recycled plastic Stronger than wood Tapered design Dimensions: 14"L x 8"W x 2-3/8"H Sold individually
	ITCRL-PR	ITI Starter Ramp Pair	\$81.99	8	ITI Starter Ramp Pair of 2 bridges the gap between the tail of a flatbed car carrier or trailer ramp and the ground surface, creating an easy transition between uneven surfaces. This starter ramp is designed with a 90 degree notch for the tail to sit in place. The low load angle the ramp provides prevents unnecessary damage to high-end vehicles or equipment with low clearance issues. The ITI ramp is made from a unique recycled material which provides the most durable and longest lasting performance versus competitive products. ITI skates are manufactured in the USA.	<ul style="list-style-type: none"> Made from extruded recycled plastic Stronger than wood Tapered design Dimensions: 14"L x 8"W x 2-3/8"H Sold in a set of two
	ITCRU	ITI Starter Ramp for Aluminum Tails	\$45.99	4	ITI Starter Ramp for Aluminum Tails bridges the gap between the tail of an aluminum flatbed car carrier or aluminum trailer ramp and the ground surface, creating an easy transition between uneven surfaces. Most aluminum beds or ramps have a rounded edge so this ramp is designed with a rounded notch for the tail to sit in place. The low load angle the ramp provides prevents unnecessary damage to high-end vehicles or equipment with low clearance issues. The ITI ramp is made from a unique recycled material which provides the most durable and longest lasting performance versus competitive products. ITI skates are manufactured in the USA. For the pair use part #ITCRU-PR.	<ul style="list-style-type: none"> Made from extruded recycled plastic Stronger than wood Open box design Dimensions: 14"L x 8"W x 2-1/4"H Sold individually
	ITCRU-PR	ITI Starter Ramp Pair for Aluminum Beds	\$81.99	8	ITI Starter Ramp Pair of 2 for Aluminum Tails bridges the gap between the tail of an aluminum flatbed car carrier or aluminum trailer ramp and the ground surface, creating an easy transition between uneven surfaces. Most aluminum beds or ramps have a rounded edge so this ramp is designed with a rounded notch for the tail to sit in place. The low load angle the ramp provides prevents unnecessary damage to high-end vehicles or equipment with low clearance issues. The ITI ramp is made from a unique recycled material which provides the most durable and longest lasting performance versus competitive products. ITI skates are manufactured in the USA.	<ul style="list-style-type: none"> Made from extruded recycled plastic Stronger than wood Open box design Dimensions: 14"L x 8"W x 2-1/4"H Sold in a set of two
	ITCSP6	ITI Pocket Plug Container Skate	\$118.99	7	Utilizing the Pocket Plug Container Skate from ITI makes loading or moving shipping containers slick and easy! Place this patented sea container skate beneath the corner of the container - fitting the raised plug nicely into the oblong pocket of the container. The skate's rounded ends eases the transition from the ground surface to the angle of a rollback carrier or trailer. The slick surface of the skate makes moving objects easy! The ITI Pocket Plug Container Skate is made from a unique recycled material which provides the most durable and longest lasting performance versus competitive products. ITI skates are manufactured in the USA. For the pair of skates use part #ITCSP6-PR. * Please note the attached wire lanyard is for handling and storage only - NOT a pull point.	<ul style="list-style-type: none"> Made from extruded recycled plastic Rot, wear, oil and grease resistant Stronger than wood Dimensions: 12"L x 5.5"W x 5.38"L Sold individually
	ITCSP6-PR	ITI Pocket Plug Container Skate Pair	\$199.99	14	Utilizing the Pocket Plug Container Skate Pair of 2 from ITI makes loading or moving shipping containers slick and easy! Place this patented sea container skate beneath the corner of the container - fitting the raised plug nicely into the oblong pocket of the container. The skate's rounded ends eases the transition from the ground surface to the angle of a rollback carrier or trailer. The slick surface of the skate makes moving objects easy! The ITI Pocket Plug Container Skate is made from a unique recycled material which provides the most durable and longest lasting performance versus competitive products. ITI skates are manufactured in the USA.	<ul style="list-style-type: none"> Made from extruded recycled plastic Rot, wear, oil and grease resistant Stronger than wood Dimensions: 12"L x 5.5"W x 5.38"L Sold in a set of two
	ITCSP5	ITI Low Pro Pocket Plug Container Skate	\$62.99	4	Utilizing the Low Pro Pocket Plug Container Skate from ITI makes loading or moving shipping containers slick and easy! This container skate has a low-profile design achieving an overall lower height of the container when loaded on a trailer or a flatbed on a truck. Place the sea container skate beneath the corner of the container - fitting the raised plug nicely into the oblong pocket of the container. The skate's rounded ends eases the transition from the ground surface to the angle of a rollback carrier or trailer. The slick surface of the skate makes moving objects easy! The ITI Low Pro Pocket Plug Container Skate is made from a unique recycled material which provides the most durable and longest lasting performance versus competitive products. ITI skates are manufactured in the USA.	<ul style="list-style-type: none"> Made from extruded recycled plastic Rot, wear, oil and grease resistant Stronger than wood Dimensions: 11.75"L x 5.5"W x 2.69"H Sold individually
	ITCSPX	ITI Flush End Container Skate	\$89.99	1.8	The Flush End Container Skate from ITI makes loading or moving shipping containers slick and easy! This container skate is unique in that it is designed to sit flush to the edge of the shipping container. This allows for closer side-by-side storage of the containers when in a storage yard. This patented skate has a low-profile design allowing a lower overall height of the container when loaded on a trailer or a flatbed on a truck. Place the sea container skate beneath the corner of the container - fitting the raised plug nicely into the oblong pocket of the container. The skate's rounded ends eases the transition from the ground surface to the angle of a rollback carrier or trailer. The slick surface of the skate makes moving objects easy! The ITI Flush End Container Skate is made from a unique recycled material which provides the most durable and longest lasting performance versus competitive products. ITI skates are manufactured in the USA.	<ul style="list-style-type: none"> Made from extruded recycled plastic Rot, wear, oil and grease resistant Stronger than wood Dimensions: 11.75"L x 5.5"W x 2.69"H Sold individually
	ITCS444	ITI Crossmember Container Skate	\$62.99	3	ITI Crossmember Container Skate makes loading and moving shipping containers easier. When the corner pockets are not accessible due to dirt, mud or debris - this handy skate is the tool to use. Simply find a crossmember on the bottom side of the sea container and place the crossmember into the 4x4 pocket and winch into position. The skate's tapered end eases the transition from the ground surface to the angle of a rollback carrier or trailer. The slick surface of the skate makes moving objects easy! The ITI Crossmember Container Skate is made from a unique recycled material which provides the most durable and longest lasting performance versus competitive products. ITI skates are manufactured in the USA.	<ul style="list-style-type: none"> Made from extruded recycled plastic Rot, wear, oil and grease resistant Stronger than wood Dimensions: 11-3/8"L x 3-1/2"W x 3-1/2"H Sold individually
	ITCS4	ITI Universal Container Skate	\$31.99	2	This ITI Universal Container Skate makes loading and moving shipping containers easier. When the corner pockets are not accessible, this flat, low profile skate is the tool to use since you can place it anywhere along the bottom of the sea container. The container sits on the flat area of the skate and is winched into position. The skate's tapered end eases the transition from the ground surface to the angle of a rollback carrier or trailer. The slick surface of the skate makes moving objects easy! The ITI Universal Container Skate is made from a unique recycled material which provides the most durable and longest lasting performance versus competitive products. ITI skates are manufactured in the USA.	<ul style="list-style-type: none"> Made from extruded recycled plastic Rot, wear, oil and grease resistant Stronger than wood Sold individually

	ITSSS	ITI Trailer Jack Skate	\$102.99	0.5	ITI Trailer Jack Skate is used when loading or moving trailers. Place the trailer jack pedestal shoe or wheel into the pocket of the skate. The slick surface of the skate allows for more easily moving a trailer by hand - without having to lift the tongue of the trailer off the ground. It also protects parking lots, driveways and warehouse floors from damage or marring. You can utilize this skate when loading a disabled vehicle with a trailer hitch, too! As the vehicle makes the approach up the incline of a trailer or car carrier, this skate can be placed below the hitch to prevent the hitch from gouging the road surface or parking lot, causing unnecessary damage. The slick surface of the skate makes moving objects easy! The ITI Trailer Jack Skate is made from a unique recycled material which provides the most durable and longest lasting performance versus competitive products. ITI skates are manufactured in the USA.	<ul style="list-style-type: none"> * Made from extruded recycled plastic * Stronger than wood * Open box design * Dimensions: 12"L x 5-3/8" x 2-1/2"H * Sold individually
	ITLW	ITI Lockout Wedges	\$7.99	0.25	ITI Lockout Wedges create the necessary gap between the window and door frame to insert lockout tools on a locked vehicle. The tapered design slides past the weatherstripping and then widens as the wedge is pushed deeper. The recycled plastic material is durable for years of reliable use. ITI products are manufactured in the USA.	<ul style="list-style-type: none"> * Made from extruded recycled plastic * Stronger than wood * Sold individually
	ITCPS5L	ITI Low Pro Pocket Plug Container Skate with Lock Tab	\$85.99		Utilizing the Low Pro Pocket Plug Container Skate from ITI makes loading or moving shipping containers slick and easy! This patented skate has a low-profile design achieving an overall lower height of the container when loaded on a trailer or a flatbed on a truck. Place the sea container skate beneath the corner of the container - fitting the raised plug nicely into the oblong pocket of the container. The skate's rounded ends eases the transition from the ground surface to the angle of a rollback carrier or trailer. The slick surface of the skate makes moving objects easy! ITI has added a new twist to its line of container skates by adding a quarter-turn locking tab to the top side. The steel plate is held in place by a recessed through-bolt with a locking nut, flat washer and stainless-steel friction washer. Once the container skate is inserted into the corner pocket of the sea can, the safety tab can be turned a quarter-turn in either direction to hold the skate in place. The locking tab prevents the skate from disconnecting from the container while sliding across uneven surfaces.	<ul style="list-style-type: none"> * Made from extruded recycled plastic * Rot, wear, oil and grease resistant * Stronger than wood * Dimensions: 11.75"L x 5.5"W x 2.69"H * Sold individually
	ITCPS6L	ITI Pocket Plug Container Skate with Lock Tab	\$139.99		Utilizing the Pocket Plug Container Skate from ITI makes loading or moving shipping containers slick and easy! Place this patented sea container skate beneath the corner of the container - fitting the raised plug nicely into the oblong pocket of the container. 	ITI-MK	ITI Rollback Master Kit	\$648.99		<p>Make room in your car carrier toolbox for this Rollback Master Kit from ITI. ITI skates are known for their durability and reliability when it comes moving locked or disabled vehicles. This kit features a set of four automotive skates for use with most passenger vehicles, and a pair of Big & Tall Skates and a pair of XL Big & Tall Skates for those larger tires found on pickups and SUVs. The kit also includes a control arm skate suited for vehicles with wheel impairment or suspension issues as well as two extensions: one for additional clearance and another for trailer axles. Lastly, the ITI Rollback Master Kit comes with a Trailer Jack Skate for moving trailers or protecting receiver hitches and a Lockout Wedge for use with door tools. Save over buying these products individually.</p>	<ul style="list-style-type: none"> * Made from extruded recycled plastic * Rot, wear, oil and grease resistant * Stronger than wood <p>Kit Includes:</p> <ul style="list-style-type: none"> * (1) ITI Automotive Skate Kit - Set of 4 * (1) ITI Big & Tall Automotive Skate Pair - Set of 2 * (1) ITI XL Big & Tall Automotive Skate Pair - Set of 2 * (1) ITI Control Arm Skate * (1) ITI Height Extender for the Control Arm Skate * (1) ITI Axle Tube Height Extender for the Control Arm Skate * (1) ITI Lockout Wedge * (1) ITI Trailer Jack Skate

	ITI-YK	ITI Yellow Rollback Essentials Kit	\$374.99		<p>ITI has produced a yellow Signature Series of its popular line of skates to help tow operators identify them in low-light situations and, therefore, keep better control of them under a pull. They are made from the same durable material as ITI's traditional, earth-tone line of skates but offer greater visibility at night and better contrast against gravel and dirty road surfaces. To make sure you have the right skate for the job, ITI has assembled this line of yellow skates into a Rollback Essentials Kit. Included are a set of four automotive skates for use with most passenger vehicles. The kit also features a control arm skate suited for vehicles with wheel impairment or suspension issues as well as two extensions: one for additional clearance and another for trailer axles. Save over buying these skates individually.</p>	<ul style="list-style-type: none"> * Made from extruded recycled plastic * Rot, wear, oil and grease resistant * Stronger than wood <p>Kit Includes:</p> <ul style="list-style-type: none"> * (1) ITI Yellow Automotive Skate Kit - Set of 4 * (1) ITI Yellow Control Arm Skate * (1) ITI Yellow Height Extender for the control arm skate * (1) ITI Yellow Axle Tube Height Extender
